

Mechanic

JOB SUMMARY

This position performs regular preventative maintenance on equipment to ensure equipment functions properly. Analyzes and repairs equipment when it breaks by using tools to repair damage and by replacing parts that cannot be repaired. Assists the Service Manager in whatever is necessary to keep equipment running.

QUALIFICATION REQUIREMENTS

To perform this job successfully, an individual must be able to perform each essential duty satisfactorily. The requirements listed below are representative of the knowledge, skills and/or abilities required. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions. This job description is not to be construed as an exhaustive statement of duties, responsibilities or requirements. Employees may be required to perform any other job-related task as requested by their Supervisor.

ESSENTIAL JOB RESPONSIBILITIES

- Maintain all equipment pursuant to company's standards, including regular services, daily maintenance, and all regulatory requirements.
- Change oil and filters; lubricate all equipment.
- Prepare all equipment for use on the next day.
- Replace parts or repair all equipment as the work schedule demands.
- Drive to job site to repair pumps when necessary.
- Fix flat tires and change tires when necessary.
- Troubleshoot problems over the phone when necessary.
- Welding and metal fabricating
- Ensure all trucks meet DOT specifications at all times.
- Keep a list of parts used and hours spent on repairs.
- Operate pump when necessary.
- Work overtime as the work schedule demands.

ADDITIONAL DUTIES AND RESPONSIBILITIES

- All work performed will follow safety, and regulatory guidelines and rules as specified by company.
- Maintain shop pursuant to company service manual.
- All inventoried items are to be kept safe, clean and orderly at all times.
- Access all areas of company's equipment as required for maintaining equipment. Access truck cab, forklift, and second level parts room.
- Access spaces with small entry ways such as the area between drive train and truck frame to troubleshoot, service, and repair pumps.

- Access all boom areas to troubleshoot, service, and repair.
- Access Separate Placing Booms located at customer's jobsite to maintain company's equipment.

SUPERVISION EXERCISED

This position does not supervise other employees.

REQUIRED EXPERIENCE AND SKILLS

- Must be trained in repairs, hydraulic and electrical systems
- Must have good welding and metal fabricating skills.
- Federal DOT Commercial Driver's License (CDL) and Medical Card are required at all times.
